

From the Principal High Talent

In the recent 2019 Koala mini Challenge & Friendship Cup, Jayden Ho (7M) won bronze in the U12 Sabre and gold in the U12 Sabre team and Oscar Shi (7S) won bronze in the U14

Sabre and gold in the U14 Sabre team. Well done, boys! Hunar Verma (SHS-2019) was awarded the prestigious NSW Combined High School Sports Association Sporting Blue for cricket. Congratulations, Hunar!

School Chaplaincy Program

The Australian Government is investing \$247 million over four years (2019-2022) to renew the National School Chaplaincy Program (NSCP). While the Australian Government funds the NSCP, states and territories are responsible for its administration. The NSCP supports the wellbeing of students and school communities through the provision of pastoral care services and strategies delivered by chaplains. Participating schools are eligible to receive up to \$20,280 in metropolitan areas. This funding will support approximately 3000 schools per year to access the services of a qualified chaplain. The renewed NSCP has a greater focus on supporting students and school communities affected by cyberbullying, with NSCP chaplains to complete professional learning on this topic.

Sydney Boys has been awarded funding for a School Chaplain for 2020-2022. For next year, Mr Matthew Cotton will be in the role of School Chaplain. His focus will be on mentoring late enrolment students and wellbeing issues generally, including cyber-bullying. The position is part time and will complement Matt's other duties as Year Adviser and MIC of sailing and rugby.

Scholarship Applications

There is only one week left for students to apply for the **Phillip Day Memorial** and **Sir Roden and Lady Cutler Foundation** Scholarships. If you have financial needs due to family or special circumstances; if you are a great all-rounder; or if you have a special talent that needs extra resources to help you develop, please consider applying. There are different criteria for each of these scholarships. Scholarships are valued at \$1500 each year in school credit. Application forms can be downloaded from the school website – www.sydneboyshigh.com/scholarships. Applications close on Friday, November 29.

Interpreting Year 11 Reports - Semester 2

Teachers record individual marks for courses, and these are run against an ATAR predictor program. All the raw marks are converted into scaled marks per unit. In the iterative scaling process, students' marks in one course are compared against all the other students who completed the same course and against their performances in their other courses. The data we use are last year's HSC results for High. The essential comparative assumption is that boys will perform at the same standard this year as they did last year. Means and standard deviations are derived from our HSC results from the previous year and applied to our results in the current year. A scaled score out of 50 is calculated for each course on a one-unit basis. Where candidatures are very small – eg visual arts and LOTE- we use historical results in that course in our school to calculate the mean and standard deviation to be applied to this year's results. We use all 12 Preliminary Units to calculate our ATAR estimate for two reasons. First, we would like students to receive a realistic appraisal of their progress in state terms as well as relative to their peers at High. Second, we want them to know their relative

performance in each of their courses, to inform their subsequent choices. Next April, the estimate process will be moderated against the 2019 HSC results and calculated for the best ten units for each student.

At this stage of the year, every Year 11 student faces a choice, some have more choices to make than others. Will I do 12 units, 11, ten or less? For those students who have a guaranteed entrance into Extension 2 mathematics, they can drop two courses immediately (Extension English and a 2-unit course) and still have ten units to present at the HSC. Students who really want to exit a course and have made the rank cut-off for extension 1 mathematics, can keep their Extension English and drop a course. Most accelerants remain doing ten units until their HSC results in the acceleration course are published. Acceleration students have a choice to reduce their load to 8 units if they believe their HSC marks for their chosen course are high enough. Students qualifying and choosing to do four units of English can drop one course. High performing students tend to use acceleration results as insurance and do ten units for the HSC anyway. Others want to be rid of a weak course and explore choosing others – eg picking up one or two-unit studies of religion, or taking an extension unit in history, music or LOTE. Students I speak to when discussing their reports are thoughtful about their strengths and weaknesses and mindful of their preferred tertiary options. Pragmatism often informs their decisions. At this important time, future tertiary intentions are important considerations. Choices are made to maximise enjoyment, ATAR ranks or both. I hope all Year 11 students choose sagely.

Dr K A Jaggar
Principal

Meet the 2020 Prefect Intern

What do you love about rowing?

Nothing can compare to that feeling when you're paddling in the eight on a glassy morning and suddenly everything seems to click together. But if I had said that this feeling was the only thing I loved about the sport; I'd be kidding myself. What really brings me back to training each week is the atmosphere that the senior squad always seems to carry. The atmosphere when you've completed another 40 min Tuesday morning run and all congratulate each other on a huge effort for the sprint lap around Bat and Ball, the atmosphere when you're sitting at the start line of a race with the confidence that everyone in the crew will leave everything out on the course, the atmosphere when you're warming up in the single sculls on a Thursday afternoon for yet another time trial race against each other, but wish each other good luck nonetheless.

These small moments are what I think define a sport like rowing at Sydney High and what we should be striving to achieve more in school life.

What has been one of your best moments at High?

Coming off the water at Head of the River this year, disappointed in the result, knowing that I would not sit in the eight again for at least another 5 months, and that some would never row for High again, was painful. But when we came up to the end of the pontoon, we were met by thunderous applause and cheers from the 200 High boys who'd come out to Penrith to support the rowers. They were completely unphased by the result. These boys hadn't shown up in the hope of seeing us lift up some trophy at the end of the day, but simply to acknowledge the hard work we'd put in. After putting the boat down, I and so many High boys, including Year 12s I'd barely ever spoken to, coming up to me to shake my hand and congratulate me out of genuine respect. This moment had changed my outlook on High.

What extracurricular activities do you participate in?

The only extracurricular activity I participate in apart from GPS sport is Army Cadets. I joined the school's Army Cadet unit in 2016 as a Year 8 kid, solely under the peer pressure of Kevin Tran, after missing the recruitment period in Year 7. I remember my attitude coming into it being that it would be a good way to earn award scheme points and could potentially be fun. At the time, the unit barely had 30 cadets and was a very tight-knit community. I remember being very impressed with our instructor's speaking skills as he presented a 30-minute impromptu lesson on drill to us and immediately seeing that as a skill I might gain with other cadets. Sure enough, Kevin and I

were lucky enough to move up the ranks quickly. After spending many weeks on field exercises and leadership courses, I filled the appointment of Company Sergeant Major to around 100 cadets. Cadets has taught me a lot about strong leadership, including clear communication, planning skills, and the ability to speak to groups of people on the spot.

Sydney Light Rail

Tram Testing

- Tram testing and commissioning of systems is underway across the CBD and South East Light Rail route.
- With cyclists, pedestrians, drivers and trams interacting together, it's important we all play our part to stay safe around light rail.
- Whether you're walking or riding your bike, avoid distractions and cross the tram tracks safely. Drivers should be aware that road conditions have changed and to follow traffic signals.

Key links:

- [Youtube](#) Tram safety video Cyclists
- [Youtube](#) Tram safety video Motorist
- [Transportnsw.info](https://transportnsw.info) safety tips page
- <https://sydneylightrail.transport.nsw.gov.au/safety>

Important:

- Be aware at intersections for trams, and follow traffic signals.
- Always use designated crossing points, push the signal button and wait for the green signals before crossing the road.
- Step over tracks as they can be slippery when wet.
- Always look both ways and remember trams can approach from both directions.
- For prams, cyclists and wheelchairs, cross tracks on an angle to avoid wheels getting stuck in the tracks.
- If you need further information, please contact projects@transport.nsw.gov.au

From The Canteen

Helpers Required at Year 7&9 Orientation Day

When: 3.30pm onwards on Tuesday 26 November

We are looking for volunteers to showcase the wonderful work of High Canteen at orientation day stall. This is one of our big opportunities to recruit new parents. Help us spread the message and pass on High ethos & culture of volunteering.

Volunteers needed for 25, 26 November (8.30-10.30am)

Two parent helpers are required to prepare lunches for Barberis Cup. Call 96629350 if you can help out. It is a great opportunity to visit the canteen, if this is your first time and see how we operate. No prior experience necessary.

2020 Volunteer recruitment drive

Open daily from 8.30am, High Canteen relies heavily on volunteers to help prepare much of our extensive menu on site daily. They also help serve at canteen windows during recess and lunch. This allows us to keep our operating costs low while returning all profits to the school community.

Each day, we require at least 2-3 volunteers. If you have a few hours to spare either on a regular or ad hoc basis, please call Canteen managers Karen & Tracey on 962 9350. We still have a number of vacancies. Full training will be provided and language or prior experience is no barrier. Working in the canteen offers an excellent window into the world of High. It is a long standing tradition and one that we hope will continue.

Committee roles

The P&C subcommittee which manages the High Canteen is also looking for new members. We meet most months on the second Friday and much of the work is conducted electronically. If you are interested in joining the committee, please speak to the canteen managers. Prior canteen volunteering experience will give you an insight to the way the canteen operates but is not essential. Positions that need to be filled include: President, Vice President, Secretary, Volunteer coordinator & members. Most of current members retire in 2020.

Usha Arvind

President Canteen Committee

Tram Testing

The City of Sydney wants to remind the community that tram testing is underway across the CBD and South East Light Rail route. With cyclists, pedestrians, drivers and trams interacting together, it's important we all play our part to stay safe around light rail.

Whether you're walking or riding your bike, avoid distractions and cross the tram tracks safely. Drivers should be aware that road conditions have changed and to follow traffic signals.

Transport for NSW have some [safety tips](#).

See the [interactive map](#) for road closures, interchanges, pedestrian zones and more.

See [Sydney light rail](#) for more information.

Jamie Kay

Free Physiotherapist Service for Students Involved in Sport

Parents and students are advised of the weekly Sports Physiotherapy Service. The service is provided by an APA Sports Physiotherapist who have strong backgrounds in exercise and sports science. The service provides in-depth experience with both youth and elite athletes, specialising in musculoskeletal injury diagnosis and rehabilitation.

The aim of the service is to provide all injury assessments with correct diagnosis and to formulate an injury rehabilitation plan to get our students back on the field in a safe and appropriate time frame. It is also aimed at reducing injury risk and the chances of re-injury.

Where: SBHS Gym Gallery, outside Room 901

When: School Term Mondays (except for the first day of Term)

Time: 7am-9am

Cost: Free

Bookings: Turn up between the hours of 7am-9am on Mondays – no appointments taken at this stage. 1st/2nd grade players will get priority.

Rehabilitation: Students will be given advice and a rehabilitation program to be used in the schools' weights room.

For the latest news and notifications, please download SZapp from the Apple App Store or Google Play and subscribe to MUSIC. Installation guide is in High Notes.

European Music Tour Update

Sunday 24 November, 11.00am: Group and Ensemble photos for European Music Tour students. Please meet Ms Kim in the courtyard by 11am (Wet Weather: Inside the Great Hall). Order of photos on the day:

1. All 50 touring students
2. Concert Band
3. Stage Band
4. String Ensemble
5. Percussion Ensemble

Please note: Photo sessions will not be re-scheduled and will not wait for late students. Please ensure to arrive on time. Please ensure students are in FULL SCHOOL UNIFORM-all students require a blazer (+ white shirt).

All European Music tour ensembles will continue rehearsing till Week 9 in Term 4.

End of Year Concert

There will be an End of Year Concert on Sunday 24 November at 1.00pm in the schools' Great Hall. All music ensembles (excluding Chamber Choir) will be performing at the concert. Mandatory attendance is required for all students in the Music Ensembles Program at SBHS.

Performance Uniform: School uniform with white shirt, including school tie (**blazers are not required at this event**).

Please note, there will be no ensembles rehearsing after the End of Year Concert (excluding European Music tour rehearsals-EMT students continue rehearsing till Week 9 this term).

2019- 2020 Music Performance Program

There will be no music ensembles rehearsing after the End of Year Concert (excluding European Music Tour Rehearsals-continue rehearsing till Week 9 this term).

Student must take their instruments from the Music Storage Room before the last day of school this term i.e. Wednesday 18 December

All music ensembles and private instrumental lessons commence from Week 2 in 2020 Term 1, unless student(s) are advised of an alternate start date.

Music Events Calendar

Week	Date	Event	Music Students Involved
6A	Sunday 24 Nov	End of Year Concert, Great Hall at 1pm-2.30pm (approx.)	All Music Ensembles
7B	Tuesday 26 Nov	Annual Music Assembly, 9.55am Great Hall	Elective Music Students & students receiving music awards
7B – 9A	Week 7B-9A	European Music Tour Rehearsals continue rehearsing for Concert Band, Stage Band, String Ensemble and Percussion Ensemble	European Music Tour Students

Music Events are continually added and are subject to change.

SHOOTIN' HOOPS

254

Welcome back to the latest edition of Shootin Hoops. Last weekend our boys went against Saint Ignatius College, Riverview. As our First's comfortably and easily took the win against their opponent, the Seconds unfortunately fell short to Riverview. Next week Seconds will be sure to bounce back and show off the effects of their intense training. Due to the weather last weekend the C and D team games in all ages were all called off in order to prevent injury, yet most of our C and D team players showed commitment and great High Spirit by coming and supporting our teams even though not having a game to play, good job boys keep it up! Next week we'll go up against a challenging Shore School side, known to have teams stacked with skill, however so are we. With focus and intensity we will grab big wins on this upcoming weekend against Shore. Make sure to get your shots up and train hard to prepare for the upcoming matchup, make sure to support Firsts (11:00) and Seconds (10:00), both teams playing in our gymnasium on Court 1.

Brian Tran

*Adam Gordon dunks on Riverview
in front of a full house of SBHS fans*

This weekend the Firsts went Saint Ignatius College Riverview team where we calmly and comfortably took the win. The first quarter was tight, Riverview playing good defence and balancing it out on offence, us doing the same. **However it wasn't our best, after half time our Firsts got their heads in and Coach Hayman told them everything they need to do. So they began to focus more on passing, finding the man on an extra**

pass and just in general moving the ball around better, really portrayed when Adam gave off a sick two hand flush. They started to run a faster style of basketball, pushing transition and pressuring Riverview with speed they just couldn't handle. This extended our lead to 30 points. Shout out to Kwabena Brefo with 40 productivity. This win ensured our firsts their place in the final of the Raschke Cup, on the 30th of November. Next week is up against Shore in the SBHS gym, come support them at 11:15, promising a good game.

Brian Tran

Our Seconds had yet another challenging ball game against Riverview. Getting off to a rough strata critical timeout shifted the momentum back to High, running the break well with **Blake having another great game with 14 points, and Yi Tian pulling down countless boards and getting contact.** While Riverview made another run at the end of the third quarter, High became gradually more complacent, resulting in a competitive loss. Regrouping, learning and training will guarantee a much better game this week against Shore.

Edward Ly

The 16s had a fairly decent day on the weekend **as half of our teams that played won.** Unfortunately this week poor conditions of the weather early on in the day made it easier to be prone to injury, hence the smart decision to cancel the games to make sure our players don't get hurt. However, those teams that had played and lost both put up a fair fight with the A team only just losing their lead

and taking the fall by 2 points. The A team was just unprepared for the pressure trap Riverview had applied on the ball and therefore failed to move the ball which was what ultimately cultivated our defeat. B team was unfortunate this week and couldn't run the plays with the defence Riverview was giving them, but did well regardless, only barely losing. Regardless, win or loss on the weekend every team will be sure to train hard in preparation of the series of games we will play against Riverview which the 16s play at the outdoor courts, SBHS.

Brian Tran

This week we're going up against Shore, a team that is known for being stacked with skill and athleticism, but it's nothing High hasn't beaten before. Be sure to get your shots up this week as we will be facing a strong school. The Firsts and Seconds are playing at the SBHS gym, firsts at 11 and seconds at 10, so make sure you come and support our school.

Brian Tran

Two former MVP's of SBHS Basketball played on Sunday in front of the biggest crowd in NBL History. Emmett Naar and Craig Moller are pictured boxing each other out as Lamelo Ball looks to rebound.

1st XI Report

After putting up 322 runs on the first day, we decided to continue with Bilal Abbasi (10S) and Adi Srivatsan (11F) to see how many runs we could add to our grand total. Unfortunately, we couldn't get away with as much as we liked, as we lost 2 wickets for only 1 run. With around 90 overs left, we were planning to take 10 wickets from the Riverview batting line-up. However, this was much easier said than done. Adi Srivatsan and Menuja Goonaratne (11S) opened the bowling attack unfortunately finding no success. Then we brought on the spinners Vivek Mahajan

(Year 11) and Bilal Abbasi in an attempt to snatch a wicket before drinks but this was also fruitless. As the overs dragged on, the two Riverview openers piled on the runs, each getting centuries by the days end. After various attempts with bowling changes, field settings and bowling plans, Menuja Goonaratne finally captured the wicket of the Riverview opener who had managed to acquire 177 runs. This spark of hope was quickly dismissed as there were only 8 runs left to get for the chasing team. Within 2 overs, Riverview had chased the runs down, leaving our boys disappointed and depressed. With only one round left for the year and the annual Five Highs Carnival around the corner, our boys are working harder than ever to bring back some form to the team.

Vivek Mahajan

1st XI Captain

Menuja Goonaratne

1st XI Vice-Captain

Pictured: Bilal Abbasi 134*

2nd XI Report

Chasing 308 for victory, SBHS started poorly with the loss of both openers, stemming the flow of runs required. Hanujan Puvanenthiran (10F) continued resistance to Ignatius' skilful bowling allowed him to build confidence throughout the innings however couldn't find support from any of the top order. With High 5 wickets down for 46 runs at lunch, chasing became an increased concern. By assessing the situation and the conditions, it was evident that with the slow run rate and the loss of early wickets, we were going for the draw. After lunch Hanujans unfortunate departure for 28 hinted at a meagre total, with poor shot selection an increasing concern. Avi Ahi (9E) and Varun Rana (11S), provided a small platform to build upon, both being smart and tactical in their approach to manoeuvre the ball and obtain an unlikely draw. Varun's wicket for 18 did not help, however Avi's counter attack sparked hope and excitement for something unforeseen. It was always going to be a race against time, but in the end Avi's 67 came in vain with the tail not resilient enough to earn a draw, High all out for 152. Looking back, it was

clear that our bowling and fielding let us down with innumerable opportunities missed in the first week. Next week, we look to learn and capitalise from the valuable mistakes we made with another 2-day match against Joeys.

Harris Memon

2nd XI Captain

Team of the Week

4th XI

This week's match was an extremely thrilling encounter! We won the toss and chose to bowl. Our opening bowlers, Sam and Mukund, bowled in good areas and took two wickets in their opening spell. We then endured a tough period where one of their batsmen attacked our bowling and capitalised on the pace we offered. However, a well laid out plan led to him holing out to long on. We then controlled the game from then on, restricting Riverview to 115, a commendable effort considering the fact that they were on 78 at the 9 over mark. Our openers began cautiously, adding 43 in the first 9 overs before Hirosh fell. Mukund and I then controlled the chase, bringing the equation to 38 from 30 balls before we fell in quick succession. The runs dried up and we faced an uphill task, requiring 33 from 18 balls. Our chances of victory looked slim. Not to Matthew Pellen, however, who scored 15 from the next over, making the task manageable once more. Although he then got out, Vikas and Aryan added some quick runs and we needed 11 runs from the final over to win. Aryan then unleashed, hitting a massive six off the first ball of the over. They continued batting until we needed 2 off the last ball. Aryan bunted the ball to mid-off and sprinted a single, but could not make the second run and the match ended in a tie.

Guatama Desaraju

4th XI Captain

To All Parents And Players, Don't Forget To Go Through The Points Below:

- If the weather is inclement on a Saturday, you can find any changes to the fixtures on the SBHS website on the home page. No changes = game is definitely on.
- Please make sure that all the boys wear SBHS logo hats and tops.
- Make sure they drink plenty of water and carry a drink bottle with them to training and fixtures.
- For training sessions (outside of school hours) and Saturdays, parents are to email through the specific details of absence (**Student number, name, sport, team, reason and date of absence**) to absences.sport@sbhs.nsw.edu.au

● Remember all cricket games are important to attend to each Saturday, otherwise you are letting your team down.

● A **100% attendance record** equates to **5 extra Award Scheme** points for juniors.

● Please notify their coach if they are unable to attend training or their fixture.

Play Hard, Play with Sportsmanship & High Spirit and most importantly have fun with your cricket!

Best of luck on your GPS match this Saturday!

David Smith

MIC Cricket

Charles Clay

Cricket Prefect 2019/2020

Pictured: Hunar on attack

1st Grade Report

Round 5 of the trial season saw the 1st Grade boys take on Riverview. It was also the first time this trial season we played with a full team. The dominance of our team showed throughout the Saturday, winning 9-0 while dropping just 1 set. All the doubles training paid off with all 3 teams breezing through their matches dropping no more than 4 games each. The singles matches followed a similar pattern except for one match. Stepan made

light work of his opponent, serving up a double bagel, 6-0 6-0. Stepan, Andy and Hikaru all displayed strong performances; untouched by their opponents. Khobi fought back from a set down and eventually prevailed 6-3 in the third set. On Friday, the boys will travel down to Albury to compete in the Australian Schools Tennis Challenge, where they will be digging hard for a handful of gold medals. Wish us luck!

Antonio Li

14's			Moore Park 7:15-8:45am	School 1-3pm	
Development Squad		Development Squad are to train with the 4-8th grade in the mornings and 16's During Sport Time. They will also have a session every Saturday at Moore Park 12-2pm			

Last Saturday, our 14s Water Polo team played St Andrews at Riverview. Although the 14s had not lost a single game so far this season, today we had no Year 8's on our team which was very unusual. So, the pressure was on the team to work hard in this game.

We started out okay, but we weren't as strong as we usually are. Throughout the game, we were pretty well neck and neck on the scoreboard. The game was pretty normal (apart from the fact that the Year 8's were absent and as a result, we weren't in it by much).

Once we started the last quarter, we began to take the lead, right up until the point where the other team has no chance to win. So, in the end, we won 11-8 despite Riverview having their Year 8's. I think we did an impressive job as this year we remain undefeated so far.

I would like to thank the coaches and all the players in our team for doing such a great job over the season so far. I always look forward to my next game, especially with the best teammates and coaches I could possibly ever have.

J Millar

MIC Water Polo

SBHS SAILING

Sailing Report

With the wind blowing at a light 12 knots before picking up closer to the afternoon. It was a real challenge trying to keep up with the other schools who had an advantage in the lower forecast. Nevertheless, we continued to improve our skills and performed better than previous weeks.

other schools resulting in a few wins but overall better placings against the other teams. With this in mind we can only seek to further improve our skills and hopefully secure a few more wins this Saturday.

Nathan Cox

9R

Last Saturday was crucial for us in teams racing as we would be able to challenge the other schools with our newfound skills which we had been training hard over the past few weeks to master.

We were able to adapt quickly when the wind shifted from the low morning to the stronger and gustier afternoon. We used this to our advantage as this put us on even playing ground with Scots who were exceptional in light winds. We were able to challenge

Members of the sailing team before heading to racing.

The Scots Regatta Report

We woke up with an early Saturday morning start, a day of hard rowing ahead of us. We either caught the bus at the sheds at 6am or made our own way to Sydney International Regatta Centre in which we would be participating in two races each in the Shore AAGPS Regatta. As we arrived at the centre, we saw the conditions and immediately realised, that with the water being perfectly still, we were gifted perfect conditions to perform at our very best. Determined to improve from our last week's times we were focused and psyched up. Before we got on the water however, Mr Barris gave us a pep talk and gave us individual tasks to focus on during the race, namely keeping our heads in the boat, which may seem like a trivial task but is easily forgotten in the heated competitive of the races.

My crew, Year 9 4th quad had pressure mounting up as we rowed up to the start line, our crew dead silent in the final 100m metres to the start. We squared our oars in the water and the buzzer went off. Immediately we pulled power strokes in order to get an advantage on the other crews and then after 150m settled down into a steady

pace, gliding through the water. Holding out strong we put everything we had into the last 200m, catching up those few metres needed to overtake the quad ahead of us, at last we passed the finish line, short of breath, but proud of our performance.

Our crews performed outstandingly, almost all of them improving from last week dramatically. Some crews that especially stood out include 1st Quad beating Grammar, 4th Quad impressively beating Grammar, St Augustines and Kings and our 2nd VIII beating Cranbrook 1st VIII.

On the bus back to Central Station and school we first stopped at the sheds and although tired and sore from the row, unloaded our boats and oars. At last, we welcomed the end of the day and prepared to return home and catch up on the sleep we had missed. A huge thanks to Mr Barris as well as the parents and coaches for giving up their Saturday to support us and supply us with well needed nutrients for our races allowing us to perform our best as well as assisting us with trailering up boats.

Aditya Sharma

— SYDNEY BOYS HIGH SCHOOL —
‘BACK^{TO THE} SHEDS’
— DAY —

SHS Rowing would like to extend a special invitation to the Sydney Boys High Old Boys, High rowing community and their families to come ‘back to the sheds’.

Watch the inaugural old boys crews of 2005|06 and 1989|90 rowing seasons compete against the current High 1st VIII. Enjoy a scrumptious morning tea after the race.

DATE:

Saturday 7th December 2019

BRING \$2 FOR MUFTI

Bring Your Own Device 2020

PRODUCT OPTIONS

Our **recommended** devices are designed to simplify your choices and purchasing processes. A range of devices in a range of form-factors are available. All meet the school's Device Specification. All have no moving parts to ensure reliability and all are backed by a multi-year warranty where the school will act as warranty agent on your behalf. Sydney Boys High School has partnered with JB Hi-Fi Education to make our recommended devices available:

Lenovo ThinkPad Yoga L390 **\$1276**

- Multi-touch with full keyboard
- 1920 x 1080 pixel screen
- 8GB RAM + 256GB Storage
- 360 degree rotating hinge
- Windows 10
- 3 Year warranty, school-supported

Microsoft Surface Pro 7 **\$1976**

- Multi-touch with keyboard cover
- 2736 x 1824 pixel screen
- 8GB RAM + 256GB Storage
- Detachable keyboard cover
- Windows 10
- 3 Year warranty, school-supported

Apple MacBook Air 13" **\$1955**

- Conventional laptop
- 2560 x 1600 pixel retina screen
- 8GB RAM + 256GB Storage
- macOS 10.15 'Catalina'
- 3 Year warranty, school-supported

Alternative, Base Model:

Lenovo ThinkPad L390

\$1004

- Conventional laptop
- 1366 x 768 pixel screen
- Windows 10
- 3 Year warranty
- 4GB RAM + 128GB Storage

HOW TO BUY

- Visit the JB purchasing portal at <https://sbhs.co/bbuy>
- Log in with code **SBHS2020**
- Purchase using a credit card, BPAY or on interest-free terms
- Pick up from your local JB Hi-Fi store

Sydney High Rifle Club Luncheon 2019

Please come along to celebrate the achievements of all of our shooters and Sydney High winning the All Schools, 1st and 2nd Grade GPS Premierships

WHEN? Saturday 14th December 2019, 12:30pm

WHERE? The Great Hall, SBHS

WHO? For all rifle shooting students. Parents, coaches and supporters all very welcome

WHY? To acknowledge the commitment and achievements of all our shooters and support staff.

COST? \$40/person or \$20/ U12yrs -Pay to the school office by Friday 29th November, 2019.

DRESS? Full school uniform for students, smart casual for visitors

Sydney Boys High School Rifle Shooting Luncheon 2019

GERRIC Student Programs

School holiday program for gifted students

Are you a student in Year 3 – 10 at an Australian school? Are you bright, intellectually inquisitive and looking for something more challenging, more intellectually demanding, and more fun than you may sometimes experience in school? Would you like to take part in program that will really stretch your mind?

GERRIC offers a range of school holiday programs for gifted and talented students (generally students who are capable of performing in the top 10% of their age-peers) for students from years 3 -10. The GERRIC holiday programs will open students' minds to abilities they may have not suspected they possessed, and opportunities to use those abilities to the fullest during a 3 day program at the UNSW Kensington Campus or at our partner school, Matraville Sports High School.

WHY?

Giving gifted students an avenue to explore their passions and potential helps extend their thinking and reignite a passion for learning. We offer workshops in a huge range of topics, from art to artificial intelligence, with everything in between!

Gifted learners are provided with the opportunity to be surrounded by and engage with like-minded peers who share their interests.

JUNIOR SCIENTIA

Years 3-6

The courses in Junior Scientia are developed and presented by teachers qualified in gifted education and aim to encourage the interests and curiosity of gifted children. The level of difficulty in the courses is generally two years above the enrolled school level of the child, offering a challenge for gifted students.

SCIENTIA CHALLENGE

Years 7-10

The courses in the Scientia Challenge are developed and presented by practising experts from academia or industry. The level of difficulty in the courses is again pitched higher than the students' grade level, providing a rigorous and challenging program that goes beyond the scope of their school curriculum to engage and pique students' interests.

EQUITY

Scholarships and advanced placement are available.

Spatial Storytelling with Dean Utian

Have you ever considered how the buildings and spaces you occupy have embodied stories?

Have you noticed how architecture and the built form are often key characters in movies?

Film is an artform closely connected to architecture. Both create and define experiences of place and space.

Digital film making is highly accessible with our mobile phones enabling cinematic production. In this workshop, you will learn principles of filmmaking, architectural design and storytelling. We will critique films for their spatial meaning and create our own that tell a spatial story. Through the process, you will gain a deeper understanding of spatial experience and meaning, develop technical skills in digital video editing, and filmmaking capabilities to tell your own stories.

Beware, after this workshop you may never see movies in the same way.

Dean is both a Sessional Academic and Educational Designer in the Built Environment. His teaching covers digital communication, filmmaking, games and immersive environments. Dean supports the Faculty in staff capacity building, digital uplift, development of fully online courses, as well as best practice in technology enhanced learning and teaching. A recipient of the Vice Chancellor's Award for Teaching Excellence, he is passionate about education and the use of current and emerging technologies to enhance the student experience and learning outcomes.

Flex Your Wii Muscles with Heba Khamis

Can you play Nintendo's "Mario Kart" using only signals recorded from the human body? If you believe that you can, then you may well be destined to design the machines of the future. The future promises the integration of electronics and technology with the human body to improve the quality of life of the sick or disabled. The human body is alive with the most amazing range of electrical signals. Our brains are impressive computers that use electrical signals to transmit and process information – that is, to think! Our brain sends electrical signals to our muscles to instruct them to contract, or to our vital organs to regulate chemical levels. Our senses convert light, sound, touch, smell, taste, balance and acceleration, and temperature to electrical signals for our brains to process – this is how we perceive the world around us.

This workshop straddles the important interface between human physiology and electronic system implementation, which is of huge importance in all medical instrumentation design. The goal of the workshop is to control a modified computer game (Nintendo's "Mario Kart") using only signals recorded from the human body. You'll pair up in teams of two and compete (race) in a final session. The basic electronic design elements will be provided and you'll construct the final circuit and write a simple computer program to interpret the recorded signals, such that you can control the modified game console. The associated lectures will discuss the basis of the how the recorded biosignals are generated in the human body and the principles upon which the recording equipment operates.

Heba is a lecturer in the Graduate School of Biomedical Engineering, UNSW Sydney and a Research Associate with Neuroscience Research Australia. Her start up Contactile, a revolutionary approach to tactile sensing for robotic and prosthetic applications, was selected in top 6 in Best New Idea category for St George Bank Kickstart Competition 2019, at TedEx Sydney. Heba's primary research interests revolve around the application of signal processing and pattern recognition techniques to solve or understand biomedical engineering problems, including analysis of EEG, ECG, neural spike trains and inertial signals, as well as image processing, sensor design and robotic control.

Introduction to Artificial Intelligence Techniques using Logic Programming with Vladimir Tomic

You might have watched a science-fiction movie with intelligent machines or heard that artificial intelligence (AI) will change the world. In this workshop, you will be introduced to some of the techniques used to make computers behave more intelligently (e.g. to beat humans in challenging games like chess or to make complex decisions in stock markets) by leveraging logic programming in the programming language Prolog.

You will learn the basics of Prolog and will spend the majority of the workshop writing Prolog programs (of increasing complexity) using a free online programming environment. No prior programming experience in any programming language is necessary! (If you already have programming experience in another language, note that Prolog requires a different way of thinking and programming, useful for solving artificial intelligence problems.) Using Prolog examples, you will also learn about how artificial intelligence programs represent knowledge, how they solve problems by searching among potential solutions, how they make optimal decisions in game playing, and how they learn from experience.

Note: You will need to bring a fully-charged laptop or tablet.

Vladimir is an ICT educator with diverse teaching experiences, both at universities (in Europe, Canada and Australia) and in NSW secondary schools.

He is currently a Casual Academic at the UNSW School of Computer Science and Engineering where he lectures, tutors or mentors students part-time per year and has taught many gifted and talented Ph.D, Masters, and Honours university students. In addition to this, he also works full time as an IT Teacher at Taylors College.

Vladimir has taught artificial intelligence and logic programming both in NSW secondary schools and within undergraduate/postgraduate subjects at 2 universities (including tutoring UNSW COMP3411/9414 Artificial Intelligence). He is looking forward to helping GERRIC students start to learn and love this exciting area of human creativity.

Critical Thinking; Ethics; Philosophy and how to Debate an Issue Brilliantly with Michele Waterson

This program aims to develop in our children, qualities of strong critical thinking, philosophical contemplation and ethical consideration of the global issues that they, as global citizens, will encounter each day.

We begin by acknowledging: "That in a free state every man may think what he likes, and say what he thinks..." - Benedict de Spinoza

However, as citizens in a 21st Century reality of information overload, we must ensure that we are discerning consumers of information. People need to validate 'facts' and 'arguments' presented to them in order to justify all claims and assertions in line with their own world view and personal values.

Students will develop skills of: critical thinking, ethical accountability and philosophical reflection. Students will learn to delve for accountability from all facts and arguments presented to them through all media forums. Students will use these skills to build arguments and debate those arguments effectively and ethically.

Michele is the debating convenor at St Pius X College and an experienced GERRIC presenter.

The Brain in Health and Disease with Ken Ashwell

We'll study the structure and function of the normal brain and spinal cord and then consider types of disease that can affect the brain and spinal cord. The classes will explore the structure of the nervous system at the microscopic and naked eye level, and we'll discuss how function is localised in the brain. You will have the opportunity to practice clinical examinations of the nervous system on classmates and analyse how brain disease or damage might be prevented or repaired. You'll also have the opportunity to make diagnoses and recommend treatment for patients with brain disease.

Ken is a professor in the School of Medical Sciences at UNSW and a researcher of Comparative and Evolutionary Neuroscience. He is an experienced GERRIC presenter and author of textbooks.

Cinematic Sounds with Anthea and Rodney Wikstrom

Think of your favourite movie. If it had no sound or music, would it still have the same impact on you? Film music and cinematic sounds enhance character, create mood and heighten emotion in films. A soundscape can make or break a film. In this workshop, you will explore the work of film score composers, Foley artists, and the impact technology has had on the history of film music. Using computer software, you will learn to produce and arrange sounds, compose and record music, synchronize sounds to video, and create a film score soundtrack. Film composers of the future, come on down!

Anthea is a graduate of the Conservatorium High School, and of the University of NSW in violin performance, film & composition. She has performed in many interesting roles including the Edinburgh Military Tattoo, Anthony Callea and various rock & country bands. Anthea currently performs with country music act Jackie Dee, and The Real Mexico Mariachi Band. She is a trained school teacher and taught at the Conservatorium High School, accompanying students to Shanghai Conservatorium and World Expo. Anthea's enthusiasm is infectious, and is an inspiration to her violin students.

Rodney is also a passionate music educator with an interest in gifted education, and has studied with internationally respected violin pedagogues. He teaches violin privately, and is also a trained high school music teacher experienced with all levels up to HSC Music 2.

Page + Stage: Poetry and Spoken Word with David Stavanger

Step up to the mic/and let the words/take flight

In this workshop you will work on both sides of the art form – the written & spoken – to develop a small body of poetic work either for the page and/or the stage. With one of Australia's most dynamic teachers in this field, you will have fun as you learn how to tune into your creativity and find your own voice through a series of individual & group exercises exploring writing, editing and performance technique. You will also learn about the history of poetry slam before you run your own live slam on the final day, performing your original work. David will perform pieces for you, show a series of spoken word videos, as well as using a range of prompts to get the words & images flowing.

No writing or performance experience needed. At the completion of this workshop, students will also have poems that can be published online or entered into poetry writing competitions.

David Stavanger is a poet, performer, cultural producer, editor and former psychologist. In 2013 he won the Arts Queensland Thomas Shapcott Poetry Prize, resulting in the release of *The Special* (2014, UQP), his first full-length collection of poetry which was also awarded the 2015 Wesley Michel Wright Poetry Prize. David was Co-Director of QLD Poetry Festival 2015-2017, a period known for inclusive programming and stronger focus on CALD and First Nation voices. David was selected as a 2018 Melbourne Visiting Poets Program: 2018 Regional Resident by RMIT non/fiction Lab and Australian Poetry and his poem 'Octonaut' was recently short-listed for the 2019 Moth Poetry Prize (Ireland). He has been a feature at many major festivals including, Dark MOFO, Brisbane Writers Festival, Sydney Writers Festival, Tasmanian Poetry Festival, National Folk Festival, NT Writers Festival, NightWords at the Sydney Opera House, TEDx and was the first Australian to have work selected for The Spoken Word Revolution which showcased the world's best spoken word artists.
